

# All over the joint

Common orthopaedic injuries and conditions of the knee, foot and ankle, shoulder, elbow and hand

In this four-part series, our orthopaedic surgeons will discuss how to diagnose and treat a range of common problems related to the knee, foot and ankle, shoulder, elbow and hand

## PROGRAM

### Session 1

**Foot and Ankle – Common deformities, fractures and ligament injuries**

Dr Anthony Cadden, *Orthopaedic Surgeon*

### Session 2

**Knee – Common injuries and arthritis in the younger patient**

Dr Tad Gunkelman, *Orthopaedic Surgeon*

### Session 3

**Shoulder and Elbow – Common injuries**

Dr Rui Niu, *Orthopaedic Surgeon*

### Session 4

**Hand – Common injuries including lacerations, tendon and nerve injuries, foreign bodies and fractures**

Dr Peter Scougall, *Orthopaedic Surgeon*

Dr Anthony Barker, *Plastic and Reconstructive Surgeon*

## LEARNING OUTCOMES

- Identify common fractures and ligament injuries of the foot and ankle
- Describe how to assess and manage knee arthritis in the younger patient
- Outline targeted history and examination of someone with a painful shoulder
- Describe the surgical management of common elbow conditions
- Identify which hand injuries require urgent/immediate referral
