

Special Interest *Series*

Is it ADHD, ASD or trauma?

clinical features, management principles

PROGRAM

6.30pm Registration and dinner

7.00pm Presentation and discussion

Dr Justine Ellis, Psychiatrist

Dr Ellis has broad experience in both Australian and UK practices, in treating children with neurodevelopmental disorders. Her focus includes obsessive - compulsive and mood disorders in children and adolescents, with experience in complex psychopharmacology and long-term psychotherapy, including mentalisation-based therapy for children and families.

8.30pm Evaluation and close

LEARNING OUTCOMES

- Describe the main clinical features of ADHD and ASD and their common comorbidities
- Identify the impact of early developmental trauma on the developing brain
- Outline the core management principles for ADHD, ASD and trauma
