Hours: 1.5 hrs

Email if you wish to be removed from our mailing list

LEARNING OUTCOMES

- Identify common head and neck conditions encountered in general practice appropriate for specialist plastic surgery referral.
- Describe the principles of surgical management and reconstruction for skin cancers of the head and neck, including factors influencing treatment selection.
- Compare the indications, risks and expected outcomes of blepharoplasty, otoplasty and direct excision neck lift procedures.
- Apply knowledge of surgical decision-making and patient counselling to support shared care and optimise patient expectations before and after surgery.
