PROGRAM

6:30 pm: Registration and Dinner

7:00 pm: Presentation and Discussion

Gastroenterologists Dr Michael Braude and Dr Ashley Bloom to discuss.

1. Early colorectal cancer - who and how to screen
2. Abdominal pain and bloating - functional GI disorders
3. Fatty liver disease - diagnosis, screening and management

9.00pm Evaluation and close

LEARNING OUTCOMES

- Describe the role of endoscopy in screening for gastrointestinal diseases.
- Identify criteria for screening liver disease-who, when and management options.
- Recognise the key clinical features of the common functional GSI disorders.
- Identify red flags that require further investigation and referral.
